PERISTALTIC PUMP**

Analysis and Sample Processing

GO 4-CHANNEL PERISTALTIC PUMP

Peristaltic pump in robust and insensitive plastic housing.

The pump is equipped with four interchangeable cassettes. This allows the pump hoses to be replaced quickly and easily. The pressure drop can also be fine-tuned via adjusting screws.

The special feature of the pump is its pump head with eight driven rollers, which additionally ensure a higher stability during sample conveyance.

The speed is fixed.

The direction of rotation is switchable.

PERFORMANCE PROFILE GO 4-CHANNEL PERISTALTIC PUMP

Power supply

230 V 50 Hz

Power consumption

approx. 20 watt

Dimensions

approx. 260 x 165 x 200 mm (H x B x T)
